

# ARCHITECTURAL/ THEATRICAL LIGHTING

Catalog Number  
**STD-600\***

Fixture Type:

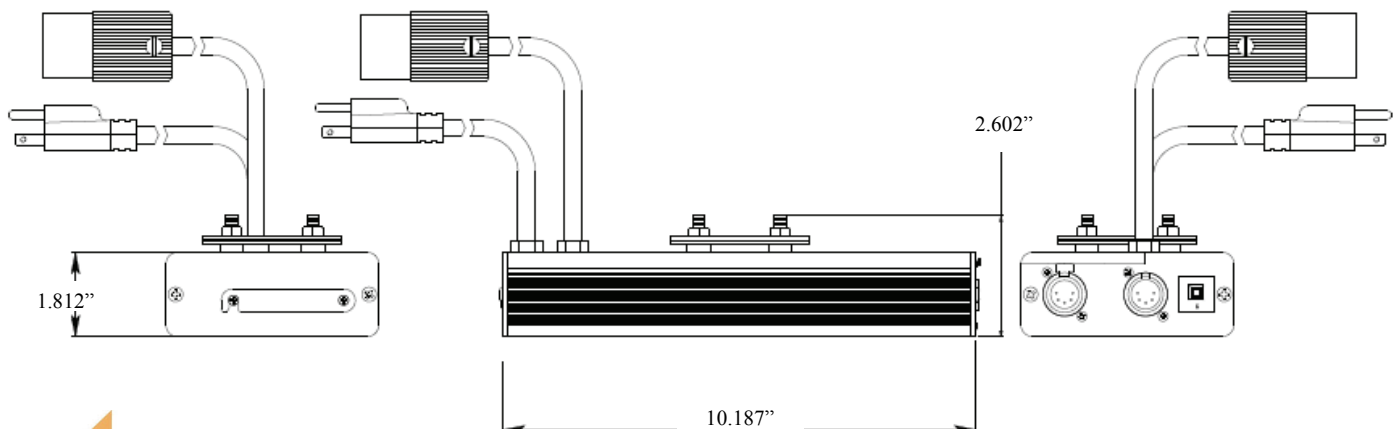

The Smart Theatrical Dimmer from Altman Lighting is an individual, yoke mounted dimmer that makes any theatrical lighting fixture a stand-alone device. Powered by a constant or switched 120vAC source, the Smart Theatrical Dimmer is controlled via DMX-512A and can be configured or monitored via RDM. Powering multiple STD-600's from a single 120vAC circuit provides independent control, while reducing the wiring required by traditional "dimmer per circuit" systems by up to 75%. Utilizing many of the same components as the dimmers in Altman's Smart-Track fixture line, the Smart Theatrical Dimmer is an integral part of Altman's "21<sup>st</sup> Century Solutions".

## 600 WATT/ DMX & RDM Smart Theatrical Dimmer—STD

Preliminary Specifications  
*Specifications subject to change without notice.*

### Features:

- Compatible with all phase-forward dimmable loads, 600w 120vAC 60 Hz
- Mounts directly to the hanging yoke of performance lighting fixtures
- 500 $\mu$ s rise time filter to reduce lamp noise
- DMX-512A and RDM Compatible via integrated 5-PIN XLR Connectors
- Integrated 5A, 120vAC Push Button Breaker
- Convection Cooled – no fans or fan noise
- Simple mounting system attaches directly to the yoke of most fixtures
- Address assignable via RDM or on-board rotary dials
- Manual Dimming & Full On Modes
- Variety of input and output connectors available for power and load connections
- ETL & cETL pending
- Made in the USA
